complete medication guide for patients

Help your patients to understand and properly take the medications you prescribe—refer them to the new drug database feature on Fallon Community Health Plan's Web site, www.fchp.org. Just click on the Healthwise Knowledgebase link.

Visitors to our Web site, www.fchp.org, have free and unlimited access to the Healthwise Knowledgebase, one of the nation's leading online resources for helping people become informed about their health and health care in active partnership with their doctors.

full drug information

In addition to Healthwise's in-depth medical content, we are now making available Healthwise's clear and concise drug information. Your patients can type a drug name into the Healthwise search engine and get instant, need-to-know facts about their medication: what it is, how to take it, what the medication looks like, what to do if a dose is missed, what to avoid while taking the drug, possible side effects, drug interactions and how to recognize an overdose. The fact sheets are another tool to promote drug safety and compliance.

See for yourself and tell your patients about it. Just go to our home page, www.fchp.org, and click on the [Healthwise Knowledgebase](#) link.
