

Quality Detail Report

Provider Name: SAMPLE DOCTOR

Provider Specialty: PULMONARY DISEASE

Provider ID: 10SAMPLE0000

**Your Overall
Adjusted
Quality
Score:**

0.946

Measure ID	Name and brief description of measure	Your number of observations for this measure	Your Compliance Rate ¹	Peer Compliance Rate ²	Your Percentile Rank ³
17895	Asthma Inappropriate ED Use This measure identifies asthmatic patients who did not visit the Emergency Department (ER) for asthma related conditions during the measurement year.	24	100%	97.35%	40th
17910	Asthma Needs Periodic Spirometry This measure identifies patients 10 years or older with a diagnosis of asthma at least two years ago who have had spirometry testing in the past two years.	14	100%	71.34%	74th
17911	COPD Inappropriate ED Use This measure identifies COPD patients who did not visit the Emergency Department (ER) for asthma related conditions during the measurement year.	10	100%	94.89%	47th
228	Persistent asthma beta-2 agonist This measure identifies patients age 5 or older with persistent asthma present during the first 6 months of the measurement year who have filled a prescription for a short-term beta-2 agonist inhaler within the last 2 years.	9	77.78%	91.41%	9th
225	Asthma or COPD avoid beta-2 agonist overuse This measure identifies patients with asthma or COPD who are not overusing beta-2 agonists.	6	100%	99.87%	1st
2376	HEDIS Persistent asthma appropriate med This measure identifies the percentage of patients 5 to 64 years of age during the measurement year who were identified as having persistent asthma and who were appropriately prescribed medication during the measurement year.	3	100%	97.53%	N/A
23120	Asthma medication management 0.5 MPR This measure identifies members 5-64 years of age during the measurement year who were identified as having persistent asthma, and who remained on an asthma controller medication for at least 50% of their treatment period.	1	100%	78.27%	N/A
17945	Asthma Spirometry to Confirm Diagnosis This measure identifies patients 11 years of age or older during the measurement year who have been newly diagnosed with asthma who received appropriate spirometry testing to confirm the diagnosis.	1	100%	78.55%	N/A

About Your Score Your Quality Score is calculated by comparing your compliance with a series of quality standards to that of your peers practicing in your specialty, adjusting for measure, patient, and sample size effects. The highest-quality providers have adjusted quality scores at, or closer to one.

About This Report This Quality Report shows your compliance rate compared to your peers for the top measures that contribute to your overall score. Your percentile rank shows the percentage of your peers whose compliance rate is lower than yours and is included for measures in which you had 5 or more observations. Because your percentile rank compares your compliance rate to the compliance rates of your peers, a high compliance rate does not necessarily result in a high percentile placement.

¹ How often you follow the measure

² How often your peers followed the measure

³ The percentage of your peers whose compliance rate was lower than yours
